

AI Native Engineer Roadmap

How to Use This Roadmap

1. **Make a copy** of this document so you can check off items as you go.
 2. **Set a weekly calendar reminder** for the next 12 weeks to review your progress and plan the upcoming week.
 3. **The Q&A sessions** will keep you accountable. Come prepared to discuss what you completed and where you're stuck.
 4. **Engage with the community** throughout the program. Ask questions, share wins, and connect with other engineers on the same journey.
-

The Program Philosophy

You're not here to collect course certificates. You're here to become a competent AI Engineer.

This program runs on two parallel tracks:

1. **Reach:** Your LinkedIn presence compounds over time. We start this immediately so by Week 12, you have 10+ weeks of activity behind you. This is your unfair advantage. Your weekly LinkedIn posts should document what you're learning: new concepts, breakthroughs, mistakes, and insights from the modules.
2. **Skills:** You'll build 1-3 AI projects throughout the program to develop real skills. But only ONE capstone project matters for your job search: the one you'll showcase on LinkedIn and talk about in interviews.

If you joined the community purely to gain AI skills, then you can generally ignore the LinkedIn directives

Of course, if time permits, feel free to work on multiple weeks at the same time. In any case, by following this template, you can finish the core community content guaranteed in 12 weeks.

Timeline Overview

- **Onboarding (Week 1):** Community setup, goal alignment
 - **LinkedIn (Week 2):** Profile, engagement, content system
 - **Technical (Weeks 3-9):** AI engineering skills, practice projects, capstone build
 - **Career (Weeks 10-12):** Resume polish, mock interviews, job applications
-

Key Milestones

- **Milestone 1 (Week 2):** LinkedIn optimized, first post published
 - **Milestone 2 (Week 6):** Core technical skills acquired, practice projects complete
 - **Milestone 3 (Week 9):** Capstone project demo-ready
 - **Milestone 4 (Week 12):** Resume polished, 10+ applications submitted, interview pipeline started
-

Week 1: Onboarding

Get oriented and connected to the community.

Checklist

- ☐ Introduce yourself in the community <https://www.skool.com/ai-engineer>
 - ☐ Complete Module: Start Here!
(<https://www.skool.com/ai-engineer/classroom/ab14392d>)
 - ☐ Watch the AI Roadmap module
(<https://www.skool.com/ai-engineer/classroom/01d93c7a>)
 - ☐ Watch the module on different AI careers
(<https://www.skool.com/ai-engineer/classroom/4ad5425e?md=194ccd54695041dbb04073d75cfd8c2>)
 - ☐ Scan LinkedIn for opportunities in your area of interest so select the best course of action for the ideal role you are aiming for
-

Week 2: LinkedIn Setup

LinkedIn is not optional. This is where opportunities find you.

Checklist

- ☐ Complete Module: AI Career Booster
(<https://www.skool.com/ai-engineer/classroom/4ad5425e>) - **you can skip the resume masterclass for now**
- ☐ Optimize your LinkedIn profile (headline, about, banner, photo)
- ☐ Set up your engagement system
- ☐ Publish your first LinkedIn post
- ☐ Comment on 3 LinkedIn posts in your feed
- ☐ Ensure you connect with the members from the AI Native Network, including me, to steer your algorithm and connect with 100+ LinkedIn members

MILESTONE 1: LinkedIn optimized, first post published.

Week 3: AI-Native Programming

Learn to code the AI-native way, with AI assistance from day one.

Checklist

- ☐ Complete Module: AI-Native Programming (<https://www.skool.com/ai-engineer/classroom/5d4e6be7>)
 - ☐ Focus on practicing Python + TypeScript using the exercises
 - ☐ Post 1 LinkedIn update
 - ☐ Comment on 3 LinkedIn posts
-

Week 4: Agentic AI Coding

Level up your AI coding skills with agentic workflows.

Checklist

- ☐ Complete Module: Agentic AI Coding (<https://www.skool.com/ai-engineer/classroom/e806d875>)
 - ☐ Decide on ONE AI coding tool you'll use for the rest of the program (Cursor, Copilot, Claude Code, etc.)
 - ☐ Think about how you can apply the techniques to customize the portfolio app from the AI-Native Programming module
 - ☐ Post 1 LinkedIn update
 - ☐ Comment on 3 LinkedIn posts
-

Week 5: LLM Fundamentals

Understand how LLMs actually work and build your first AI application.

Checklist

- ☐ Complete Module: LLM Fundamentals (<https://www.skool.com/ai-engineer/classroom/d955cef9>)
 - ☐ Post 1 LinkedIn update
 - ☐ Comment on 3 LinkedIn posts
-

Week 6: Cloud AI Integrations

Connect to the APIs that power production AI systems.

Checklist

- ☐ Complete Module: Cloud AI Integrations
(<https://www.skool.com/ai-engineer/classroom/40bc6ca2>)
- ☐ Practice in various projects: for example, connect the portfolio app from the AI-Native Programming module to cloud APIs instead of local models
- ☐ Post 1 LinkedIn update
- ☐ Comment on 3 LinkedIn posts

MILESTONE 2: Core technical modules complete. You now have the skills to build real AI applications.

Week 7: Full Stack AI Masterclass

Apply everything you've learned to build ONE impressive project. To do this, follow the Full Stack AI Masterclass for inspiration. This solution is Azure based, but we will discuss the stack that makes most sense for you.

Checklist

- ☐ Complete Module: Full Stack AI Masterclass
(<https://www.skool.com/ai-engineer/classroom/fed568ce>)
- ☐ Finalize capstone project idea
- ☐ Post 1 LinkedIn update
- ☐ Comment on 3 LinkedIn posts
- ☐ Begin recruiter/hiring manager outreach (aim for 5 personalized messages this week)

Q&A Session

Capstone project ideation. We'll choose the right project based on your background and target roles. We'll choose the right project and identify target companies/hiring managers to reach out to.

About Your Capstone: Based on our conversations, we'll identify a project that:

- Leverages your existing domain knowledge
 - Demonstrates AI engineering skills employers want
 - Gives you something concrete to talk about in interviews
 - Provides ongoing content for LinkedIn
-

Week 8: Capstone Project Build

Checklist

- ☐ Start building your capstone project
- ☐ Post 1 LinkedIn update (document your build)
- ☐ Comment on 3 LinkedIn posts
- ☐ Continue recruiter/HM outreach (5 more personalized messages)

Q&A Session

Capstone progress check, troubleshooting, and outreach review.

Week 9: Capstone Project Polish

Checklist

- ☐ Finish and deploy your capstone project MVP
- ☐ Ensure the project is highlighted on your LinkedIn page featured section
- ☐ Post 1 LinkedIn update (share your deployed project)
- ☐ Comment on 3 LinkedIn posts
- ☐ Continue recruiter/HM outreach (5 more messages) and follow up on earlier messages to initiate conversations

MILESTONE 3: Capstone project deployed. You have something real to show..

Week 10: Resume Masterclass

Rewrite your resume for AI engineering roles.

Checklist

- ☐ Complete Module: Resume Masterclass (<https://www.skool.com/ai-engineer/classroom/4ad5425e>)
 - ☐ Set up your resume in LaTeX format (template provided)
 - ☐ Rewrite your resume with AI focus, ensure capstone project is included
 - ☐ Post 1 LinkedIn update
 - ☐ Comment on 3 LinkedIn posts
 - ☐ Continue recruiter/HM outreach (5 more messages, aim for 20+ total by now)
 - ☐ Follow up to convert connections into conversations (target: 5+ conversations)
-

Week 11: Applications + Mock Interview

Launch your job search with real applications and interview practice.

Checklist

- ☐ Apply to 10+ jobs (use your LaTeX resume for quick personalization)
 - ☐ Continue recruiter/HM outreach (5 more messages, aim for 25+ total)
-

Week 12: Final Push

Application follow-ups, interview preparation, and wrap-up.

Checklist

- ☐ Follow up on applications
- ☐ Continue applying (aim for 25+ total)
- ☐ Final outreach push to hit 30+ messages

MILESTONE 4: Resume polished, applications flowing, interview pipeline started.

Your Module Journey

1. **Start Here!** (Week 1)
2. **AI Career Booster** (Week 2)
3. **AI-Native Programming** (Week 3)
4. **Agentic AI Coding** (Week 4)
5. **LLM Fundamentals** (Week 5)
6. **Cloud AI Integrations** (Week 6)
7. **Full Stack AI Masterclass** (Weeks 7-9)
8. **Resume Masterclass** (Week 10)

Optional Modules

- **AI Agents** (<https://www.skool.com/ai-engineer/classroom/ae168734>) - During capstone (Weeks 7-9). Bonus material to enhance your capstone. This is advanced content, so do it at your own discretion and balance functionality with complexity.
- **Promotions Accelerator** (<https://www.skool.com/ai-engineer/classroom/d1cf0a8f>) - Week 12+. If your goal is to get promoted at your current company, not find a new role.

- **Advanced Local AI** (<https://www.skool.com/ai-engineer/classroom/f9ecb635>) - Anytime. Only if you have a powerful PC, or targeting roles where local AI matters (e.g. government).

Questions?

Bring them to your next Q&A or post in the community. You're not doing this alone.
