

*"ask me any questions before you begin"*

## why this works

### forces clarification

the ai identifies gaps in your brief that you didn't know existed. it asks what you forgot to specify.

### prevents wasted output

instead of generating 2,000 words in the wrong direction, it aligns with you first. one prompt saves ten rewrites.

### reveals hidden assumptions

the ai surfaces assumptions about audience, format, tone, and scope that would otherwise go unchecked.

### try it now

*"write me a proposal for our new ai audit service.  
**ask me any questions before you begin.**"*

*"what 3 other questions can i ask to improve this prompt?"*

## why this works

### you don't know what you don't know

the ai has seen millions of similar requests. it knows which details produce the best results and which ones you're missing.

### iterative refinement

each question it suggests makes your prompt sharper. three rounds of this turns a vague request into a precision brief.

### teaches you prompting

over time you learn what good prompts look like. the ai becomes your prompt coach, not just your output machine.

### the power loop

1. write your prompt
2. ask **"what 3 questions can improve this?"**
3. answer the questions
4. resubmit the improved prompt

*repeat until output is perfect.*
